

stand  
height adjustable desk - VI.I

## RISK WHEN SITTING TOO LONG..

Sitting for long periods can lead to weakening and wasting away of the large leg and gluteal muscles. These large sitting or lying down for too long increase your risk of chronic health problems, such heart disease, diabetes and some of cancers. Too much sitting can also bad for your mental health.

sources: [www.betterhealth.vic.gov.au](http://www.betterhealth.vic.gov.au)

When you sit, you use less energy than you do when you stand or move. Research has linked sitting for long periods of time with a number of health concern. They include obesity and a cluster of conditions - increased blood presure, high blood sugar, excess body fat around the waist and abnormal cholestrol levels - that make up metabolic syndrome. Too much sitting overall prolonged periods of sitting also seem to increase the risk of death from cardiovascular disease and cancer

sources: [www.mayoclinic.org](http://www.mayoclinic.org)

Research suggests that no matter what your total sitting time is, regular interruptions from sitting(even just by standing up) may help to reduce your risk of developing heart disease and diabetes. Sitting at a desk or driving can be a large part of many peoples work routine.

Sitting causes your hip flexors to shorten, and your seated position can also hurt your back, particularly if you have bad posture or don't use an ergonomic chair. Also, poor posture while sitting can cause compression on the discs in your spine and can lead to premature degeneration, which results in chronic pain
