- design with mould and solid structure
- up to 5 years warranty

CERTIFICATION & PATENT: cULus | CE | FC | | CB | BIFMA INTERNATIONAL | EN527 | PSE

product features

Note: 3 column can load up to 125KG

3 column

Smoothly and stably lift up your desk with a motorized system and extendable column, with the allowable load depending on the quantity of columns.

control panel

Digital display control panel with USB port and three programmable positions, also comes with a time reminder for you to stand or sit

Anti collision system

There are safety features in place to protect the user from injury and the table top from damage.

Cable management

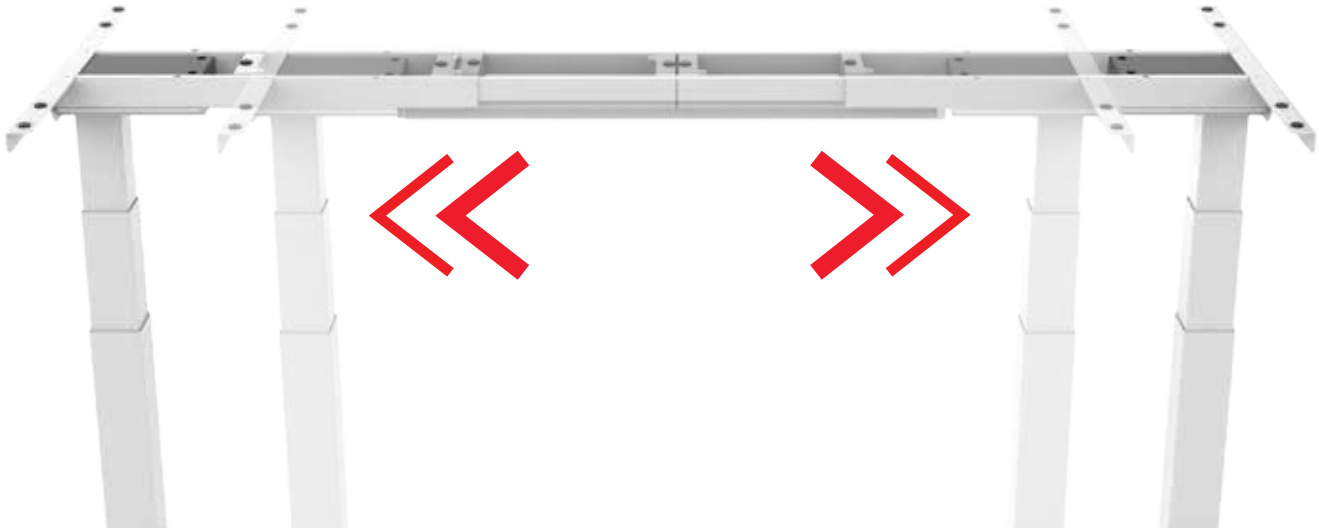
Systematic cable management makes your desk more neat and tidy.

Silent operation

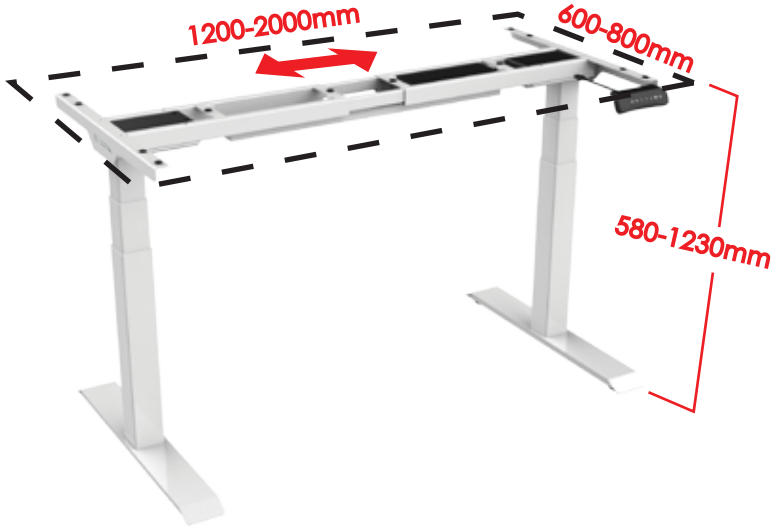
The sound produced by the motorized operation is lower than 50db, which is lower than normal speaking volume. This means you need not worry about noise if you plan to have a cluster workstation while requiring a silent environment for work.

adjustable beam

Customize the table length up to maximum of 2000mm and make it easily adjustable.

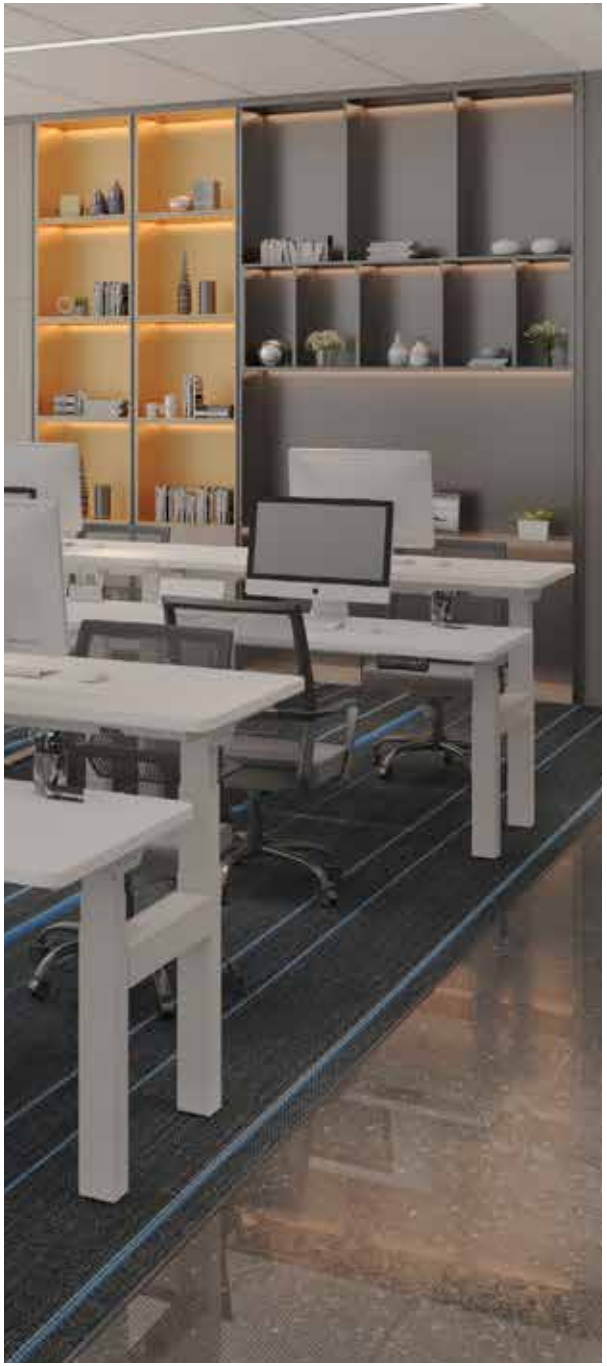


Note: Metal structure available in full white and black colour only



Variety size
Customize the desk size suitable for you space and needs.

Solid metal structure
The moulded metal structure comes with powder coating that makes its surface scratch-resistant.



Dual motor
Motorized operation enable faster and more stable adjustment, making lifting work smoother.

Stroke
25.6"(650mm)

//ergonomic

Set your desk to the proper height: Adjust your desk to the proper height for your sitting and standing positions. The desk should be at a height where your arm can rest comfortably on the desk surface and your eyes are level with the top of your computer monitor.

systematic

The design and manufacturing process of height adjustable desk must be systematic to ensure consistency and quality. This involves creating detailed design specifications, selecting appropriate materials, and establishing manufacturing process that can be replicated consistenly.

modern

Motorized Adjustability: Many modern height adjustable desks now come with motorized mechanisms that allow you to adjust the height of the desk with the push of a button. This feature make it much easier and convenient to switch between sitting and standing positions.

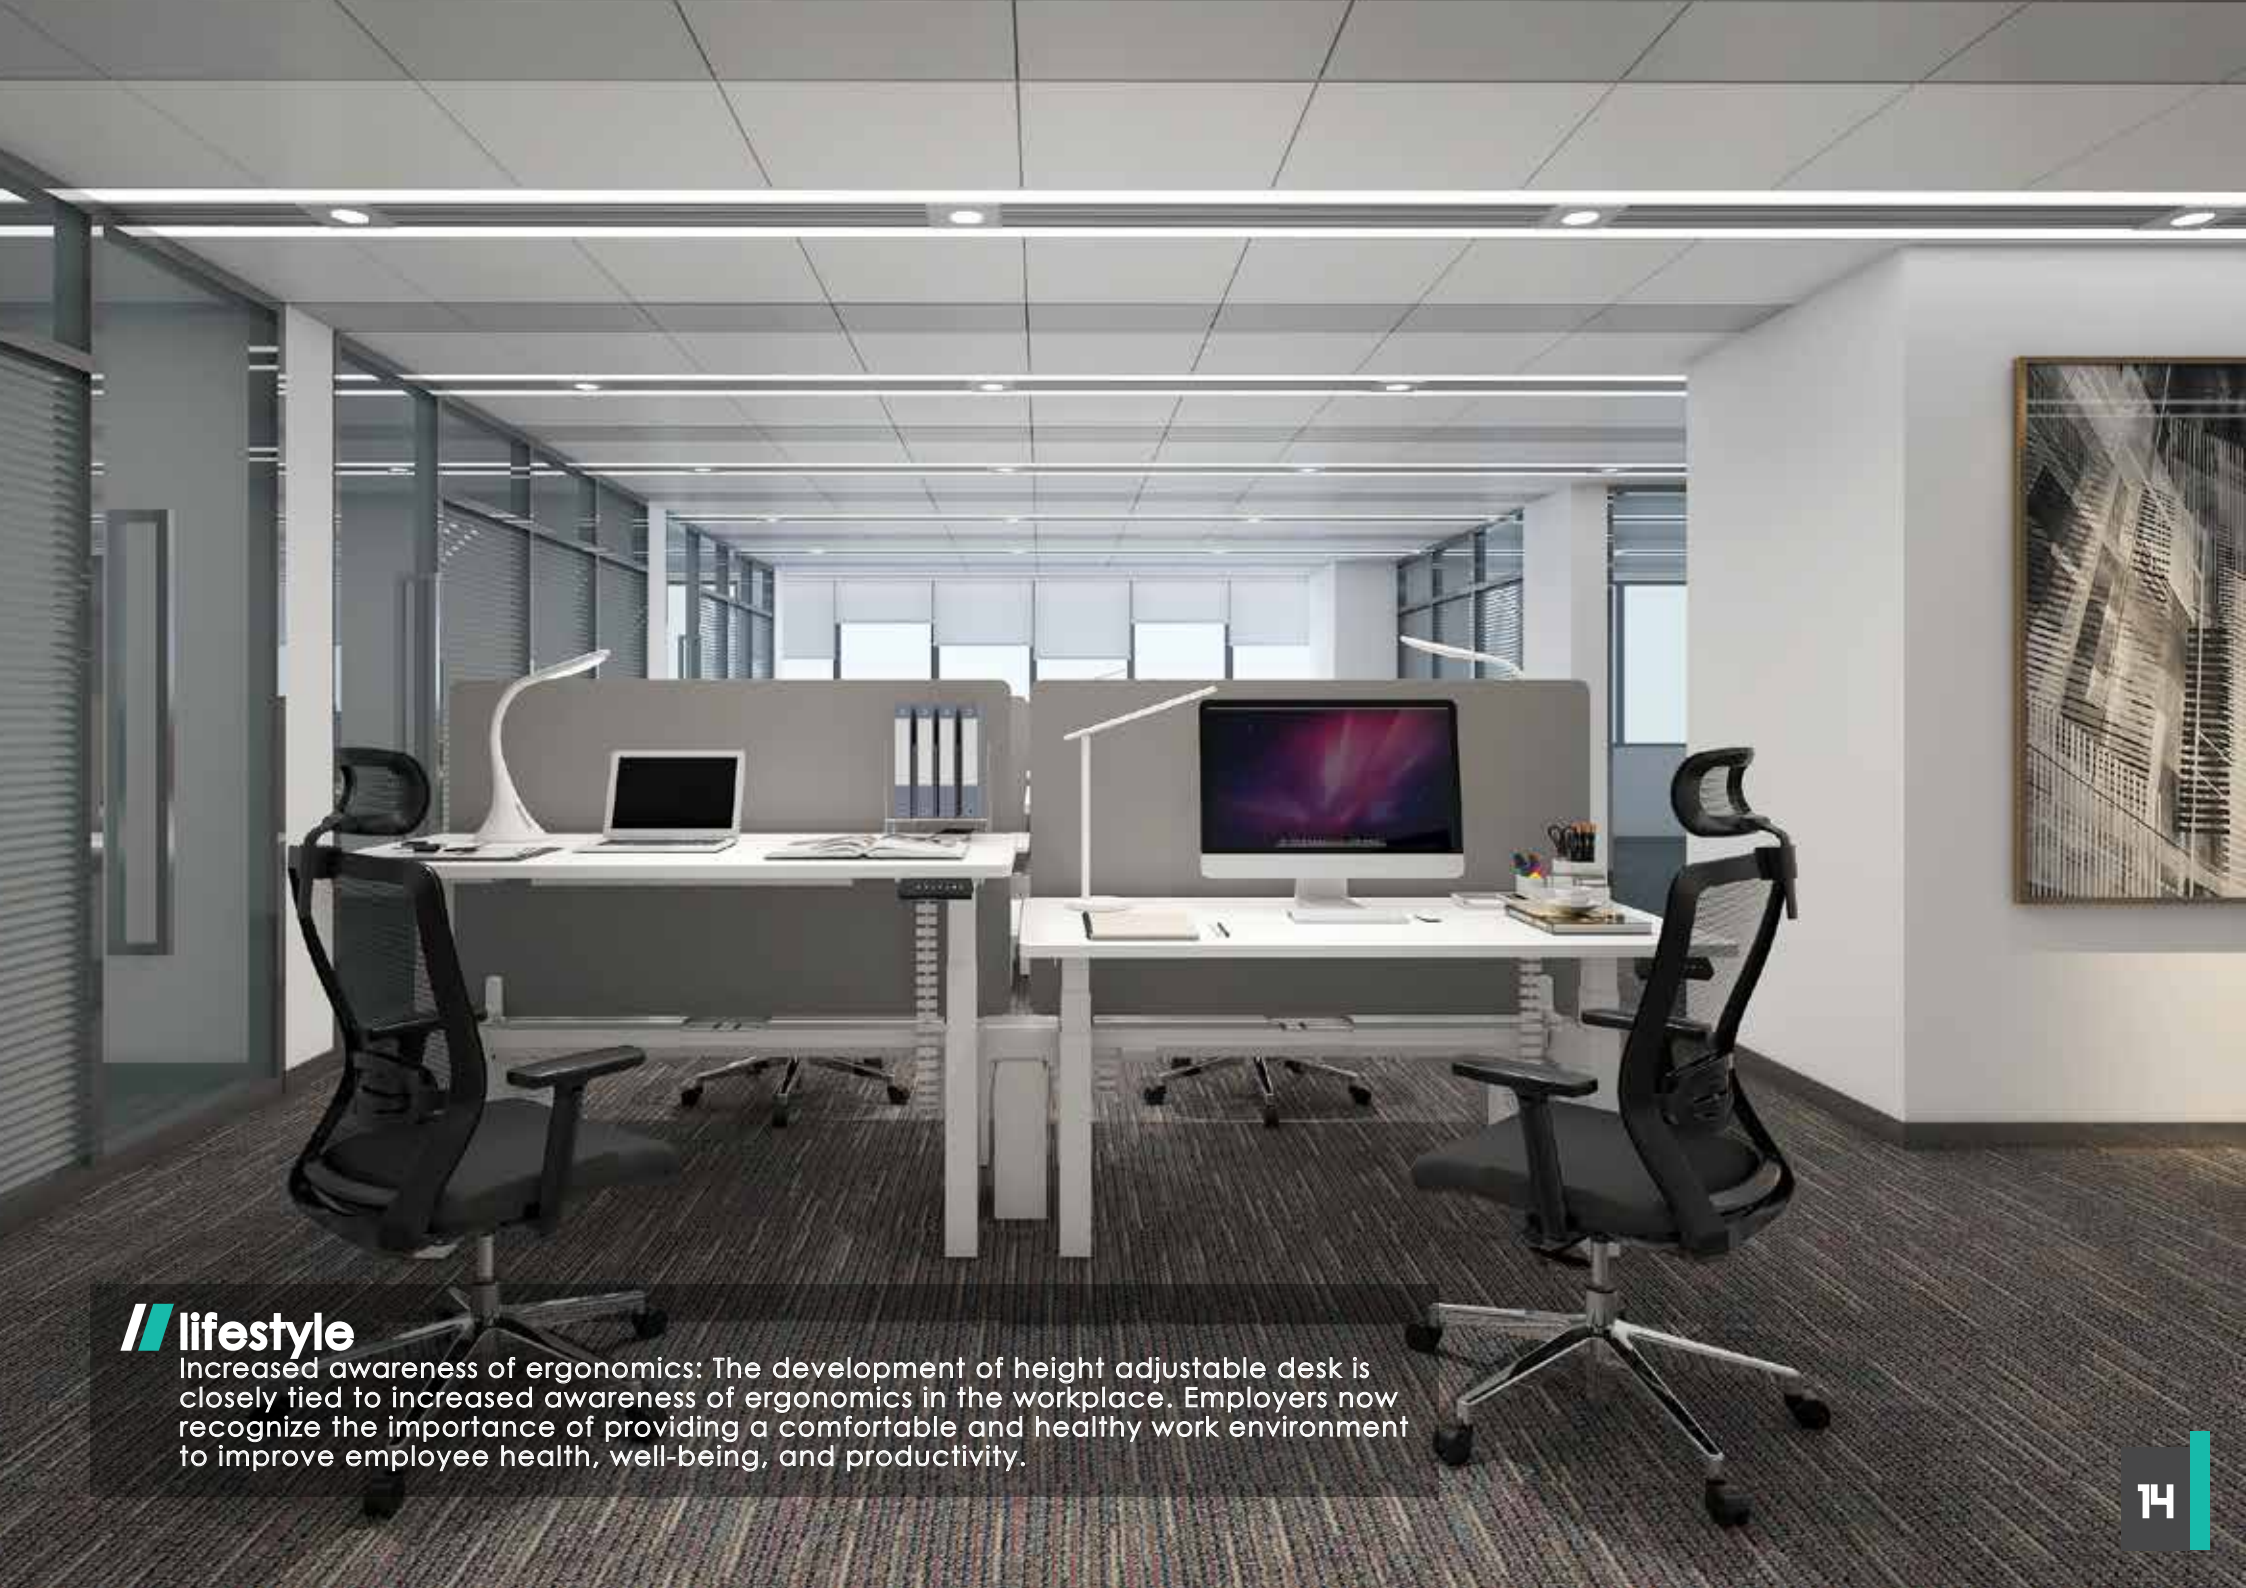
comfort

Reduced eye strain: Adjusting the height of the desk and monitor can help to reduce eye strain and neck discomfort by ensuring that the top of monitor is at or slightly below eye level, and that the screen is not too close or too far away.

teamwork

Collaborative design: Team of designers, engineers, ergonomists and other experts work together to create height adjustable desk that are safe, functional, and ergonomic. Collaboration ensures that the desks meet the needs of a variety of users and can be used effectively in different work environments.



lifestyle

Increased awareness of ergonomics: The development of height adjustable desk is closely tied to increased awareness of ergonomics in the workplace. Employers now recognize the importance of providing a comfortable and healthy work environment to improve employee health, well-being, and productivity.

(up to 5 years)

productivity

Enhanced morale: Providing employees with a comfortable and healthy work environment can enhance morale and create a positive work culture. By investing in height adjustable desks, employers can show that they value their employees' well-being, leading to increased job satisfaction and loyalty.

development

Enhance cognitive function: Research has shown that standing desks can improve cognitive function, including memory, attention and creativity. Height adjustable desks provide users with the flexibilty to switch between sitting and standing, allowing them to experience the cognitive benefits of both positions.

privacy

Standing position: Some users prefer to use their height adjustable desk in a standing position. This can provide an added level of privacy, as the user is less visible to others in the office. Standing also allows for greater mobility, making it easier to move around and change positions as needed.

aesthetic

Often feature a sleek and modern design, with clean lines and a minimalist aesthetic. This design can convey a sense of professionalism and sophistication.

neat & tidy

Improves cable management: Height adjustable desks can also help to improve cable management. By allowing users to adjust the height of their desk, cable and cords can be routed through the desk more easily, reducing the risk of tripping or getting tangled

// no limit

Support different work styles: Height adjustable desks can be used for a variety of tasks, including writing, typing, reading, drawing and more. They can also be adjusted to support different workstyles, such as standing, sitting or a combination of both.
